The Aeronautical Journal of the Royal Aeronautical Society

INCORPORATING THE INSTITUTION OF AERONAUTICAL ENGINEERS AND THE HELICOPTER ASSOCIATION OF GREAT BRITAIN

VOLUME LXXVI
JANUARY - DECEMBER 1972

(**S** indicates Supplementary Papers)

AERODYNAMICS
Development of a hypervelocity wind tunnel, Dr. R. J. Stalker, pp. 379-384 (June).
The induced drag on a rolling wing, E. J. Hancock, pp. 617-620 (Oct.).
Spectral Gust Alleviation Factors for Pitching Aircraft, E. Huntley and P. G. Littlewood, pp. 433-442 (July).

AEROELASTICITY
Follower force instability of a pod-mounted jet engine, G. T. S. Done, pp. 103-107 (Feb.).

AEROSPACE ENGINEERING
The advantages of adjoint-control transformations when determining optimal trajectories by Pontryagin's Maximum Principle, L. C. W. Dixon and M. C. Biggs, pp. 169-174 (March).
Effect of environmental forces on the attitude dynamics of gravity orientated satellites. Part III. Close earth orbits accounting for aerodynamic forces, R. C. Flanagan and V. J. Modi, pp. 34-40 (Jan.)

AGRICULTURAL AVIATION
Day to day problems. Agricultural Aviation Symposium. The design of agricultural aircraft, D. Lockspeiser; The farmers' point of view, F. P. H. Huntington; The farmers' point of view, J. R. Walgate; Ground organisation of aerial crop spraying, P. M. G. Perrow, pp. 121-130 (Feb.) **S.**

AIRCRAFT
Airtruk (Illus.), p. 123 (Feb.) **S.**
An end to aircraft noise? L. G. Dawson and T. D. Sells, pp. 286-297 (May).
An-2 (Illus.), p. 122 (Feb.) **S.**
A new shape in the sky, Sixtieth Wilbur and Orville Wright Memorial Lecture, Sir Morien Morgan, pp. 1-18 (Jan.).
BAC 221 (Illus.), p. 14 (Jan.).
Bell helicopter, first experimental (Illus.), p. 158 (March).
Bell helicopter with skid undercarriage (Illus.), p. 159 (March).
Bell HSL tandem rotor helicopters (Illus.), p. 159 (March).
Bell Jet Ranger (Illus.), p. 162 (March).
Bell Model 47 with a Cessna wing (Illus.), p. 160 (March).
Bell Model 47 with experimental hingeless rotor (Illus.), p. 161 (March).
Bell high performance helicopter (Illus.), p. 161 (March).
Bell Model 204 with four-bladed hingeless rotor (Illus.), p. 161 (March).
Bell XV-3 tilt prop-rotor convertiplane (Illus.), p. 160 (March).
Cessna Agwagon (Illus.), p. 123 (Feb.) **S.**
Cessna 180 (Illus.), p. 124 (Feb.) **S.**
Cierva C-30 (Illus.), p. 469 (Aug.), C-40 (Illus.), p. 470 (Aug.).
Chanute 1896-type biplane hang glider (Illus.), p. 304 (May).
Chanute/Herring powered triplane design (Illus.), p. 305 (May).
Chanute's Quadruplane hang glider (Illus.), p. 303 (May).
Coaxial helicopter (Illus.), p. 158 (March).
Concorde (Illus.), pp. 1, 6, 18 (Jan.).
Curtiss CR-3, Curtiss R3C-2 (Illus.), p. 66 (Feb.).
Deperdussin (Illus), p. 65 (Feb.).
Fiat AS-6 tandem engine (Illus.), p. 70 (Feb.).
Fiat C-29 (Illus.), p. 67 (Feb.).
Fiat AS-6 tandem engine (Illus.), p. 69 (Feb.).
Fletcher FU-24 (Illus.), p. 122 (Feb.) **S.**
FW 190 (Illus), p. 365 (June).
GEM scooter (Illus.), p. 160 (March).
General Dynamics F-111. Concept and Conduct of Proof Test of F-111 Production Aircraft, W. D. Buntin, pp. 587-598 (Oct.).
Grumman Ag-Cat (Illus.), p. 122 (Feb.) **S.**
Hargrave soaring kite (Illus.), p. 301 (May).
Hawker Tempest (Illus.), p. 366 (June).
Hawker Typhoon (Illus.), p. 364 (June).
Herring's triplane hang glider (Illus.), p. 304 (May).
Lilienthal's first biplane hang glider, No. 13 of 1895 (Illus.), p. 301 (May).
Macchi M-33 (Illus.), pp. 66 and 79 (Feb.).
Macchi M-39, M-52 and M-67 (Illus.), p. 67 (Feb.).
MC-72 (Illus.), pp. 68 and 79 (Feb.).
Optimal paths for minimising landing transition distance for jet-lift VTOL aircraft, E. Huntley, pp. 308-317 (May).
Orbiter (Illus.), p. 152 (March).
Piaggio P.7 (Illus.), p. 68 (Feb.).
Pilcher's multiplane (Illus.), p. 299 (May).
Pilcher's triplane (Illus.), p. 300 (May).
Piper Pawnee (Illus.), p. 123 (Feb.) **S.**
Prospector (Illus.), p. 123 (Feb.) **S.**
Quail Commander (Illus.), p. 122 (Feb.) **S.**
Remote control helicopter (Illus.), p. 157 (March).
Rolls-Royce "R" engine (Illus.), p. 70 (Feb.).
Saturn V launch vehicle (Illus.), p. 84 (Feb.).
Siai SM.65 (Illus.), p. 68 (Feb.).
Sikorsky R-4, R-6 and S-51 (Illus.), p. 471 (Aug.).
Sopwith Tabloid (Illus.), p. 66 (Feb.).
Space-shuttle (Illus.), pp. 19, 20, 22, 24 (Jan.).
Engine (Illus.), p. 20 (Jan.).
Space tug (Illus.), p. 22 (Jan.).
SST layouts (Illus.), pp. 3-6 (Jan.).
Stearman Kadet (Illus.), p. 121 (Feb.) **S.**
Supermarine S.4 (Illus.), p. 66 (Feb.).
Supermarine S.5, S.6 (Illus.), p. 67 (Feb.).
S.6B (Illus.), p. 69 (Feb.).
TOPS spacecraft (Illus.), p. 30 (Jan.).
Weir W-5 and W-6 (Illus.), p. 470 (Aug.).
Westland P-531 (Illus.), p. 477 (Aug.), Wasp (Illus.), p. 478 and p. 485 (Aug.), Wessex HAS Mk. 3 (Illus.), p. 481 (Aug.), Sea King HAS Mk. 1 (Illus.), p. 482 (Aug.), Wessex Mk. 5 (Illus.), p. 485 (Aug.).
Z-37 Cmelák (Illus.), p. 123 (Feb.) **S.**

AIRCRAFT BRAKES
Advanced materials for aircraft brakes, Dr. John V. Weaver (Lecture), pp. 695-698 (Dec.).

AIRCRAFT SYSTEMS
Energy flow diagram, R. le Claire, pp. 507-508 (Aug.).
Concorde navigation system, H. Hill, pp. 578-683 (Sept.) **S.**

AIRCRAFT TYRES
Aircraft tyres—an analysis of performance and development criteria for the 70s, R. G. Clifton and J. L. Leonard, pp. 195-216 (April).

AIRPORTS
An airports system for UK air services, Sir Peter Masefield (Nineteenth Mitchell Memorial Lecture), pp. 275-285 (May).
The Third London Airport—the Process of Decision, Prof. D. Keith-Lucas, pp. 461-467 (July) **S.**

AIR RACING
Formula one air racing, R. J. Hardy (Lecture), pp. 699-703 (Dec.).

AIRSHIPS
Pressure airships: a review, Karl Hecks, pp. 647-656 (Nov.).

ANGLO-AMERICAN AERONAUTICAL CONFERENCE, TWELFTH
List of papers, p. 62 (Jan.) **S.**
Engines for civil V/STOL, E. A. White and G. L. Wilde (Lecture), pp. 627-632 (Oct.) **S.**
The Third London Airport—the Process of Decision, Prof. D. Keith-Lucas, pp. 461-467 (July) **S.**

ANNUAL REPORT OF THE COUNCIL, 1971, THE ONE HUNDRED AND SEVENTH
pp. 217-247 (April).

AIR REGISTRATION BOARD
List of Technical Notes, pp. 32-33 (Jan.).

AIR TRAFFIC CONTROL
All weather operations—present achievements and future prospects, K. W. Smith, pp. 183-187 (March) **S.**
Mediator—a programme for a British advanced ATC system, Air Vice-Marshal E. D. Crew, pp. 58-61 (Jan.) **S.**

AIR TRANSPORT
Air transport demand estimates for UK domestic and international routes, A. P. Ellison. Part I. Demand models, pp. 261-267 (April) **S.** Part 2. Estimates, pp. 327-341 (May) **S.**
Air transport development between the UK and Europe—the next twenty years, K. G. Wilkinson, pp. 343-351 (June).

ATHERTON, L. A.
Industrial Relations in the Aviation Industry (Symposium), pp. 419-422 (July).

AUSTRALIA
The Common Market and Australia's external aviation policy (27th British Commonwealth Lecture), H. W. Poulton, pp. 131-151 (March).

AVIONICS
Advances in helicopter avionics, J. E. Nethaway (Lecture), pp. 641-646 (Nov.).

BATDORF, Dr. S. B.
On sonic boom avoidance, pp. 541-542 (Sept.).

BAUER, H. F., WANG, J. T. S. and CHEN, P. Y.
Axisymmetric hydroelastic sloshing in a circular cylindrical container, pp. 704-712.

BAZZOCCHI, dr. E.
Technical aspects of the Schneider Trophy and the world speed record for seaplanes, pp. 65-82 (Feb.).

BEAMONT, R. P.
Experiences in military flying during the Second World War, pp. 362-370 (June).

BEGG, R. D., CARTER, J. H. T. and MACLELLAN, G. D. S.
Some incompressible jet flow and reattachment effects in fluid control elements, pp. 663-668 (Nov.).

BIGGS, M. C.
The advantages of adjoint-control transformations when determining optimal trajectories by Pontryagin's Maximum Principle, pp. 169-174 (March).

BOLLAND, E. B.
The flexibility matrix for an "exact" torsion-bending finite element, pp. 613-615 (Oct.).

BLACK, Prof. J.
"Supersonic" flow in the animal world, pp. 319-320 (May).

BOUNDARY LAYERS
Spatial variations of the boundary layer in a large low-speed wind tunnel, L. F. East, pp. 43-44 (Jan.).

BOYKIN, W. H.
Remarks on Pontryagin's Maximum Principle applied to a structural optimisation problem, pp. 175-176 (March).

BRADSHAW, P.
The Understanding and Prediction of Turbulent Flow (Sixth Reynolds-Prandtl Lecture), pp. 403-418 (July).

BRENNAN, M. J.
V/STOL developments in Hawker Siddeley Aviation Ltd. (Lecture), pp. 391-421 (June) **S.**

BREWER, GEORGE F.
The Future of General Aviation in Europe (Lecture), pp. 352-361 (June).

BRITISH COMMONWEALTH LECTURE, 27th
The Common Market and Australia's external aviation policy, H. W. Poulton, pp. 131-151 (March).

BROWNE, SECOR D.
Adrift on the Air Ocean—the Future of Air Commerce (Sixty-first Wilbur and Orville Wright Memorial Lecture) (Lecture Summary), p. VI (Nov.).

BRYSON, CAPT. L. B., with HEENAN, F. E. and JOHNSON, C. A.
Helicopters in the Royal Navy, pp. 469-500 (Aug.).

BUNTIN, W. D.
Concept and conduct of proof test of F-111 production aircraft, pp. 587-598 (Oct.).

BURROWS, A. A. and MILES, W. L.
Aircraft fault isolation based on pattern of cockpit indications: a human factors approach, pp. 545-550 (Sept.).

CAIN, D. and DUFFY, J.
On the use of the Preston tube in elliptical ducts, pp. 371-373 (June).

CALVERT, J. R.
Some experiments on the flow past a sphere, pp. 248-250 (April).

CARNEGIE, Prof. W. and RAO, J. S.
Non-linear vibration of rotating cantilever blades treated by the Ritz averaging process, pp. 566-569 (Sept.).

CARTER, J. H. T., BEGG, R. D. and MACLELLAN, G. D. S.
Some incompressible jet flow and reattachment effects in fluid control elements, pp. 663-668 (Nov.).

CHEN, P. Y., BAUER, H. F. and WANG, J. T. S.
Axisymmetric hydroelastic sloshing in a circular cylindrical container, pp. 704-712.

CHENG, Prof. BIN
The legal aspects—Hague Convention on Hijacking of Aircraft 1970, pp. 529-532 (Sept.).

CIERVA MEMORIAL LECTURE, TWELFTH
Contributions of the Bell Helicopter Company to helicopter development, B. Kelley, pp. 157-165 (March).

CLIFTON, R. G.
Aircraft tyres—an analysis of performance and development criteria for the 70s, pp. 195-216 (April).

COMMON MARKET
The Common Market and Australia's external aviation policy (Twenty-seventh British Commonwealth Lecture), H. W. Poulton, pp. 131-151 (March).

COMPUTERS
Hybrid computation in aeronautical engineering, K. R. Greene, pp. 97-100 (Feb.).
The use of computers in design and development (Report of discussion held by Joint RAeS/IEE Committee on Applications of Electricity and Electronics in Aircraft), prepared by A. K. Desai, p. 115. (Feb.).

COLCLOUGH, W. J.
The development of a composite propeller blade with a carbon fibre reinforced plastics spar, pp. 53-57 (Jan.) **S.**

CORRESPONDENCE
The Case for the Convertible Rotor—a different V-port . . .. A. W. J. Smith, p. VI (Jan.).
Hafner's Reply, R. Hafner, p. VI (Jan.).

CREW, Air Vice-Marshall E. D.
Mediator—a programme for a British advanced ATC system, pp. 58-61 (Jan.) **S.**

DAWSON, L. G.
An End to Aircraft Noise? (Lecture Summary), p. VI (Feb.).
(Lecture), pp. 286-297 (May).

DESAI, A. K.
The use of computers in design and development (Report of discussion held by Joint RAeS/IEE Committee on Applications of Electricity and Electronics in Aircraft), p. 115 (Feb.).

DESIGN
Predicting Design Costs, D. J. Leech and D. L. Earthrowl, pp. 575-577 (Sept.) **S.**
Remarks on Pontryagin's Maximum Principle applied to a structural optimisation problem, W. H. Boykin and R. L. Sierakowski, pp. 175-176 (March).

DEVRIESE, J.
Olympus in Concorde (Lecture Summary), p. IV (March).

DEVRIESSE, J. and YOUNG, P. H.
Olympus in Concorde, pp. 683-694 (Dec.).

DISCUSSION—CONTRIBUTORS TO
Andrews, E. J., p. 499 (Aug.); Austin, R. E., p. 500 (Aug.); Armstrong, F. W., p. 294 (May); Banks, Air Cdre. F. R., p. 294 (May); Barton, W., p. 359 (June); Brown, Capt. E. M., p. 500 (Aug.); Chichester-Miles, I., p. 293 (May); Davies, S. D., p. 351 (June); Denholm, Cdr. E. T., p. 500 (Aug.); de Vere, Christopher, p. 357 (June); Greatrex, F. B., p. 293 (May); Helier, E. J., p. 350 (June), p. 358 (June); Hildred, Sir William, p. 150 (March); Hislop, Dr. George, p. 350 (June); Kemp, E. D. G., p. 295 (May); Kendall, W. A. C., p. 350 (June); Laight, B. P., p. 351 (June); Law, Gp. Capt. J. N. C., p. 499 (Aug.); Le Sueur, H. E., p. 499 (Aug.); Lilley, Prof. G. M., p. 294 (May); Masefield, Sir Peter, p. 150 (March); Moult, Dr. E. S., p. 295 (May); Prizeman, R. W., p. 358 (June); Probert, Col. J. R., p. 499 (Aug.); Self, R., p. 360 (June); Stewart, D. G., p. 295 (May); Swain, F. L., p. 499 (Aug.); Van Os, G. H., p. 359 (June); Wheeler, Air Cdre., p. 126 (Feb.) **S**; Whitby, R. H., p. 151 (March); Wigdor, L. S., p. 500 (Aug.); Winny, H. F., p. 499 (Aug.).

DIXON, L. C. W.
The advantages of adjoint-control transformations when determining optimal trajectories by Pontryagin's Maximum Principle, pp. 169-174 (March).

DONE, G. T. S.
Follower force instability of a pod-mounted jet engine, pp. 103-107 (Feb.).

DUFFY, J. and CAIN D.
On the use of the Preston tube in elliptical ducts, pp. 371-373 (June).

EAST, L. F.
Spatial variations of the boundary layer in a large low-speed wind tunnel, pp. 43-44 (Jan.).

EARTHROWL, D. L. and LEECH, D. J.
Predicting Design Costs, pp. 575-577 (Sept.) **S.**

ECONOMICS
Air transport demand estimates for UK domestic and international routes, A. P. Ellison. Part 1. Demand models, pp. 261-267 (April) **S.** Part 2. Estimates, pp. 327-341 (May) **S.**

EDWARDS, SIR GEORGE
UK aerospace—a personal view (Sir Henry Tizard Memorial Lecture), pp. 633-640 (Nov.).

ELLIOT, Prof. H.
Scientific deep space probes (Lecture), pp. 26-31 (Jan.).

ELLISON, A. P.
Air transport demand estimates for UK domestic and international routes. Part 1. Demand models, pp. 261-267 (April) **S.** Part 2. Estimates, pp. 327-341 (May) **S.**

ENTRAINMENT
A theory on effect of entrainment, due to jet flap which hits the ground, for an aerofoil with separation. Correction, T. Kida and Y. Miyai, p. 114 (Feb.).

ENVIRONMENT
The aeroplane as a threat to the environment, P. Lloyd, pp. 599-606 (Oct.).

FAULT FINDING
Aircraft fault isolation based on pattern of cockpit indications: a human factors approach, A. A. Burrows and W. L. Miles, pp. 545-550 (Sept.).

FLANAGAN, R. C.
Effect of environmental forces on the attitude dynamics of gravity orientated satellites. Part III. Close earth orbits accounting for aerodynamic forces, pp. 34-40 (Jan.).

FLEMING, D. and LAING, R. M.
Modelling for production, pp. 675-681 (Nov.) **S.**

FLIGHT TESTING
A new shape in the sky, Sixtieth Wilbur and Orville Wright Memorial Lecture, Sir Morien Morgan, pp. 1-18 (Jan.).
Fighter testing—spin test or spin prevention test? B. Rutan, pp. 271-273 (April) **S.** Footnote, p. 341 (May) **S.**
Lifting body flight test, Maj. J. R. Gentry, pp. 268-270 (April) **S.**

FLOW
A numerical experiment on two-dimensional turbulent separation, R. C. Sachdera, pp. 509-511 (Aug.).
Applications of shock expansion theory to the flow over non-conical delta wings, L. C. Squire, pp. 659-662 (Nov.).
A simple analytical solution to an unsteady compressible homentropic flow problem with a zero spatial pressure gradient, W. A. Woods, pp. 318-319 (May).
Energy flow diagrams, R. le Claire, pp. 507-508 (Aug.).
Errors due to pulsation in orifice meters. Comments on the paper by J. Grimson and N. Hay. Dr. B. J. Jeffery, pp. 40-42. Reply to comments, J. Grimson and N. Hay, p. 42 (Jan.).
Some experiments on the flow past a sphere, J. R. Calvert, pp. 248-250 (April).
Some incompressible jet flow and reattachment effects in fluid control elements, R. D. Begg, J. H. T. Carter and G. D. S. MacLellan, pp. 663-668 (Nov.).
"Supersonic" flow in the animal world, Prof. J. Black, pp. 319-320 (May).

FLUID MECHANICS
Axisymmetric hydroelastic sloshing in a circular cylindrical container, Profs. H. F. Bauer with J. T. S. Wang and P. Y. Chen, pp. 704-712.
Smoke observations of wakes of tandem cylinders at low Reynolds numbers, M. M. Zdravkovich, pp. 108-114 (Feb.).
The calibration of a surface static tube, J. L. Sproston and O. T. Göksel, pp. 101-103 (Feb.).

FRIED, Prof. I.
Numerical results from the application of gradient iterative techniques to the finite element vibration and stability analysis of skew plates, pp. 166-169 (March).

GENERAL AVIATION
The Future of General Aviation in Europe, George F. Brewer, pp. 352-361 (June).

GENTRY, Maj. J. R.
Lifting body flight test, pp. 268-270 (April) **S.**

GLIDING
Pilcher and the multiplane—a neglected aspect of a pioneer's work, P. M. Jarrett, pp. 298-307 (May). Addendum, p. 448 (July).

GOKSEL, O. T.
The calibration of a surface static tube, pp. 101-103 (Feb.).

GORDON, A. C.
Social Acceptability of Heliports, particularly from the standpoint of Noise (Lecture Summary), p. VII (Feb.).

GREENE, K. R.
Hybrid computation in aeronautical engineering, pp. 97-100 (Feb.).

GREENHALGH, Lt. Cdr. A.
The Development of Model Aviation in the UK (Lecture Summary), p. IV (March).

GRIMSON, J.
Reply to comments on errors due to pulsation in orifice meters, made by Dr. B. J. Jeffery, p. 42 (Jan.).

HAFNER, R.
Hafner's Reply (Correspondence), p. VI (Jan.).

HALL, Dr. I. A. M.
Future Trends (Lecture Summary), p. VIII (Feb.).

HALTON, H.
AN/USD-501 Drone System (Lecture Summary), p. V (Jan.).

HANCOCK, G. J.
The induced drag on a rolling wing, pp. 617-620 (Oct.).

HARDY, R. J.
Formula one air racing (Lecture), pp. 699-703 (Dec.).

HART, CLIVE
Another Flying Dragon, p. 551 (Sept.).

HAWKES, A. J.
Flight Testing the Harrier Nav/Attack System (Lecture Summary), p. VI (Feb.).

HAY, N.
Reply to comments on errors due to pulsation in orifice meters, made by Dr. B. J. Jeffery, p. 42 (Jan.).

HEAD, Dr. M. R.
Weighing pressures—a simple micromanometer, pp. 615-616 (Oct.).

HECKS, KARL
Pressure airships: a review, pp. 647-656 (Nov.).

HEENAN, Capt. F. E., with BRYSON, L. B. and JOHNSON, C. A.
Helicopters in the Royal Navy, pp. 469-500 (Aug.).

HEESE, LUKE A.
Work Study in Aerospace, pp. 457-460 (July) **S.**

HEINRICH, H. G.
A linearised theory of parachute opening dynamics, pp. 723-731 (Dec.).

HELICOPTERS
Contribution of the Bell Helicopter Company to helicopter development. Twelfth Cierva Memorial Lecture, B. Kelly, pp. 157-165 (March).
Helicopters in the Royal Navy, Capt. Heenan with L. B. Bryson and C. A. Johnson, pp. 469-500 (Aug.).

HILL, H.
Concorde navigation system, pp. 578-583 (Sept.) **S.**

HISTORY
Another Flying Dragon, Clive Hart, p. 551 (Sept.).
Pilcher and the multiplane—a neglected aspect of a pioneer's work, P. M. Jarrett, pp. 298-307 (May); Addendum, p. 448 (July).
Technical aspects of the Schneider Trophy and the world speed record for seaplanes, dr. E. Bazzocchi, pp. 65-82 (Feb.).

HUNTINGTON, F. P. H.
The farmers' point of view (Symposium), pp. 127-128 (Feb.) **S.**

HUNTLEY, E. and LITTLEWOOD, P. G.
Spectral Gust Alleviation Factors for Pitching Aircraft, pp. 433-442 (July).

HUNTLEY, E.
Optimal paths for minimising landing transition distance for jet-lift VTOL aircraft, pp. 308-317 (May).

INSTRUMENTATION
Weighing pressures—a simple micromanometer, Dr. M. R. Head, pp. 615-616 (Oct.).

INTERNATIONAL COLLABORATION
Co-operation between the collaborating parties, W. B. Jenkins, pp. 188-191 (March) **S.**
Co-operation between the parties to the project itself and third parties, C. B. White, pp. 192-194 (March) **S.**

INTERPLANETARY PHYSICS
Scientific deep space probes, H. Elliot (Lecture), pp. 26-31 (Jan.).

IVENS, G. W.
Aerial Application of Chemicals to control Bush in East Africa (Lecture Summary), p. IV (Jan.).

JACKSON, N. A.
Theoretical velocity distributions downstream of non-uniform single and multiple smoothing screens, pp. 251-255 (April).

JARRETT, P. M.
Pilcher and the multiplane—a neglected aspect of a pioneer's work, pp. 298-307 (May); Addendum, p. 448 (July).

JEFFERY, Dr. B. J.
Errors due to pulsation in orifice meters, comments on the paper by J. Grimson and N. Hay, pp. 40-42 (Jan.).

JENKINS, W. B.
Co-operation between the collaborating parties, pp. 188-191 (March) **S.**

JOBSON, D. A.
The application of nodal stress concepts to the bending of plates and shells, pp. 712-714.

JOHNSON, Capt. C. A., with BRYSON, L. B. and HEENAN, F. E.
Helicopters in the Royal Navy, pp. 469-500 (Aug.).

JOHNSON, Prof. D. H. N.
Industrial Relations in the Aviation Industry (Symposium Comment), pp. 424-425 (July).

KEITH-LUCAS, Prof. D.
The third London airport—the process of decision, pp. 461-467 (July) **S.**

KELLEY, B.
Contributions of the Bell Helicopter Company to helicopter development (Twelth Cierva Memorial Lecture), pp. 157-165 (March).

KENNEDY, J. N.
The use of aircraft in Forestry (Lecture Summary), p. IV (Jan.).

KEPPIE, Wg. Cdr. I. H.
Flying the Harrier from Ships (Lecture Summary), p. VI (Feb.).

KIDA, T.
A theory on effect of entrainment, due to jet flap which hits the ground for an aerofoil with separation, Correction, p. 114 (Feb.).

LAING, R. M. and FLEMING, D.
Modelling for production, pp. 675-681 (Nov.) **S.**

LANDI, P. J.
Setting up a Downtown Heliport (Lecture Summary), p. VII (Feb.).

LECTURES, DISCUSSIONS AND SYMPOSIA (for lists of Contributors to discussions, *see* Discussion)

MAIN SOCIETY
Adrift in the Air Ocean—the Future of Air Commerce (Sixty-first Wilbur and Orville Wright Memorial Lecture), Secor D. Browne (Lecture Summary), p. VI (Nov.).
Air Transport Development between the UK and Europe—the next Twenty Years, K. G. Wilkinson (Lecture), pp. 343-351 (June).
Management of the MRCA, Sixteenth Henson and Stringfellow Memorial Lecture at Yeovil, Dr. W. Stewart (Lecture Summary), p. V (Jan.).
NASA's Second Decade in Space, E. J. Manganiello (Lecture Summary), p. VI (May).
Nimrod, Sixteenth Chadwick Memorial Lecture, G. A. Whitehead (Lecture Summary), p. VII (Feb.).

Olympus in Concorde, P. Young and J. Devriese (Lecture Summary), p. IV (March). (Lecture) pp. 683-694 (Dec.).
Scar tissue and aircraft propulsion development, E. C. Simpson, pp. 607-612 (Oct.).
The Understanding and Prediction of Turbulent Flow, P. Bradshaw (Sixth Reynolds-Prandtl Lecture), pp. 403-418 (July).
UK aerospace—a personal view, Sir George Edwards (Sir Henry Tizard Memorial Lecture), pp. 633-640 (Nov.).

Agricultural Aviation Group
Agricultural Aviation—day-to-day problems (Symposium): The design of agricultural aircraft, D. Lockspeiser; The farmers' point of view, J. R. Walgate; The farmers' point of view, F. P. H. Huntington; Ground organisation of aerial crop spraying, P. M. G. Perrow, pp. 121-130 (Feb.) **S.**
Flying insects as potential targets: initial feasibility studies with airborne Doppler equipment in East Africa, R. C. Rainey, pp. 501-506 (Aug.).
Potential Anti-Pest Activities in Africa (Symposium): Aerial Control of Blackflies, with reference to Tropical Africa, D. J. Lewis; Aerial Application of Chemicals to control Bush in East Africa, G. W. Ivens; the Use of A/C in Forestry, J. N. Kennedy; Restrictions of use of Pesticides in Temperate Climates, Dr. N. W. Moore; The Rôle of Air Spraying in the control of Disease Vectors and Nuisance Insects, C. W. Lee (Lecture Summaries), p. IV (Jan.).

Air Law Group
The Hague Convention on Hijacking of Aircraft 1970 (Symposium): The legal aspects, Prof. Bin Cheng; The operational angle, D. F. Newham; Assessment of measures, legal and physical, to fight hijacking, Sir Frederick Tymms, pp. 529-540 (Sept.).
Legal aspects of international co-operation on aircraft design and production (Discussion): Co-operation between the collaborating parties, W. B. Jenkins, pp. 188-191; Co-operation between the parties to the project itself and third parties, C. B. White, pp. 192-194 (March) **S.**
The Responsibilities of A/C Engineers—Design, Manufacture and Maintenance—in relation to the law, F. P. Neill (Lecture Summary), p. V (Jan.).
The Restrictive Effects of Current Bilateral Agreements: Operator's *Viewpoint, Dr. J. G. Thomka-Gazdik* (Lecture Summary), pp. VII and VIII (Feb.).
Symposium: Industrial Relations in the Aviation Industry, L. A. Atherton; Industrial Relations in Civil Air Transport, Tudor Thomas; An Independent View, Prof. J. C. Wood; Comment, Prof. D. H. N. Johnson, pp. 419-425 (July).

Air Transport Group
The Future of General Aviation in Europe, George F. Brewer, pp. 352-361 (June).

Astronautics and Guided Flight Section
American space station activities, C. W. Mathews (Lecture), pp. 83-96 (Feb.).
Drones and Targets (Symposium): AN/USD-501 Drone System, H. Hâlton; Targets in use in the UK, J. S. Price; The Stiletto Project, F. P. Youens (Lecture Summaries), p. V (Jan.).
The Design of Missile Autopilots, R. F. Jackson (Lecture Summary), p. IV (Sept.).
Europa II Inertial Guidance, A. H. Cairns (Lecture Summary), p. IV (Sept.).
International Collaboration in the next generation of World Space Projects (Symposium): The space shuttle and its uses, C. W. Mathews, pp. 19-25; Scientific deep space probes, H. Elliot, pp. 26-31 (Jan.).
Modern Trends in the Development of Missile Guidance Techniques, K. H. E. Schirrmacher (Lecture Summary), p. IV (Sept.).
The operation of the Intelsat communications satellite system, Sydney L. W. Mellen (Symposium), pp. 519-524 (Aug.) **S.**

Branches

Divisions

Graduates' and Students' Section
Recent Advances in Thrust Vector Control for Tactical Missiles, B. Burgess (Lecture Summary), p. IV (Sept.).
The state of the art in remote sensing from space, Dr. N. Simmons (Symposium), pp. 524-527 (Aug.) **S.**

Historical Group
The Development of Model Aviation in the UK, Lt. Cdr. A. Greenhalgh (Lecture Summary), p. IV (March).
The Development of Model Aviation in the UK, Lt. Cdr. A. Greenhalgh (Lecture Summary), p. X (Oct.).
Experiences in Military Flying during the Second World War, R. P. Beamont, pp. 362-370 (June).
Experimental Establishments at Martlesham and Felixstowe, Norbert E. Rowe (Lecture Summary), p. VI (Nov.).
History of free ballooning with particular reference to operational techniques, Wg. Cdr. Turnbull (Lecture Summary), p. IV (March).

Management Studies Group
Finance and the engineer—seminar on 29th Sept. 1971 (Summary), p. VIII (June).
Modelling for production, D. Fleming and R. M. Laing (Lecture), pp. 675-681 (Nov.) **S.**
Symposium on Computers in Management: Future Trends, Dr. I. A. M. Hall (Lecture Summary), p. VIII (Feb.).

Rotorcraft Section
Helicopters in the Royal Navy, Capts. L. B. Bryson, F. E. Heenan and C. A. Johnson, pp. 469-500 (Aug.).
Heliport Symposium: The Design Aspects of Heliports, A. E. Slocombe; Setting up a Downtown Heliport, P. J. Landi; Social Acceptability of Heliports, particularly from the standpoint of Noise, Dr. R. J. Stephenson and A. C. Gordon; Flight Procedures into and out of Heliports, H. E. Wood (Lecture Summaries), pp. VI and VII (Feb.).
Advances in helicopter avionics, J. E. Nethaway (Lecture), pp. 641-646 (Nov.).
The Rotor and its Future, Thirteenth Cierva Memorial Lecture, Dr. J. P. Jones (Lecture Summary), p. IV (Sept.).

Specialist Lectures
The Aerodynamic Development of the Wing of the A300B, D. M. McRae (Lecture Summary), p. V (Jan.).
An End to Aircraft Noise? L. G. Dawson (Lecture Summary), p. VI (Feb.).
Concept and conduct of proof test of F-111 production aircraft, W. D. Buntin, pp. 587-598 (Oct.).
Metallic materials for the space shuttle, A. A. Tavassoli, pp. 152-156 (March).

Test Pilots' Group
Fighter testing—spin test or spin prevention test? B. Rutan, pp. 271-273 (April) **S**; Footnote, p. 341 (May) **S.**
Flying the Harrier from Ships, Wg. Cdr. I. H. Keppie and P. R. White; Symbology in Electronic Flight Instrument Displays, Sqn. Ldr. C. Rustin; Flight Testing the Harrier Nav/Attack System, A. J. Hawkes (Lecture Summaries), p. VI (Feb.).
Lifting body flight test, Maj. J. R. Gentry, pp. 268-270 (April) **S.**
Reprints, p. 274 (April) **S.**

LEE, C. W.
The Rôle of Air Spraying in the Control of Disease Vectors and Nuisance Insects (Lecture Summary), p. IV (Jan.).

LEONARD, J. L.
Aircraft tyres—an analysis of performance and development criteria for the 70s, pp. 195-216 (April).

LEWIS, D. J.
Aerial Control of Blackflies with reference to Tropical Africa (Lecture Summary), p. IV (Jan.).

LOCKSPEISER, D.
The design of agricultural aircraft (Symposium), pp. 121-127 (Feb.) **S.**

LOUIS BLERIOT LECTURE, TWENTY-FIFTH
Olympus in Concorde, P. Young and J. Devriese (Lecture Summary), p. IV (March. (Lecture), pp. 683-694 (Dec.).

LE CLAIRE, R.
Energy Flow Diagrams, pp. 507-508 (Aug.).

LEECH, D. J. and EARTHROWL, D. L.
Predicting Design Costs, pp. 575-577 (Sept.) **S.**

LITTLEWOOD, P. G. and HUNTLEY, E.
Spectral Gust Alleviation Factors for Pitching Aircraft, pp. 433-442 (July).

LLOYD, P.
The aeroplane as a threat to the environment, pp. 599-606 (Oct.).

McRAE, D. M.
The Aerodynamic Development of the Wing of the A300B (Lecture Summary) (Specialist), p. V (Jan.).

MANGANIELLO, E. J.
NASA's Second Decade in Space (Lecture Summary), p. VI (May).

MASEFIELD, SIR PETER
An airports system for UK air services (Nineteenth Mitchell Memorial Lecture), pp. 275-285 (May).

MACLELLAN, G. D. S., CARTER, J. H. T. and BEGG, R. D.
Some incompressible jet flow and reattachment effects in fluid control elements pp. 663-668 (Nov.).

MAINTENANCE
Aircraft fault isolation based on patterns of cockpit indications: a human factors approach, A. A. Burrows and W. W. Miles, pp. 545-550 (Sept.).

MATERIALS
Advanced materials for aircraft brakes, Dr. John V. Weaver (Lecture), pp. 695-698 (Dec.).
Development of a composite propeller blade with a carbon fibre reinforced plastics spar, W. J. Colclough and J. G. Russell, pp. 53-57 (Jan.) **S.**
Metallic materials for the space shuttle, A. A. Tavassoli (Specialist Lecture), pp. 152-156 (March).

MATHEWS, C. W.
The space shuttle and its uses, pp. 19-25 (Jan.).
American space station activities, pp. 83-96 (Feb.).

MELLEN, SYDNEY L. W.
The operation of the Intelsat communications satellite system (Symposium), pp. 519-524 (Aug.) **S.**

MILES, W. L. and BURROWS, A. A.
Aircraft fault isolation based on pattern of cockpit indications: a human factors approach, pp. 545-550 (Sept.).

MITCHELL MEMORIAL LECTURE, NINETEENTH
An airports system for UK air services, Sir Peter Masefield, pp. 275-285 (May).

MIYAI, Y.
A theory on effect of entrainment, due to jet flap which hits the ground for an aerofoil with separation. Correction, p. 114 (Feb.).

MODI, V. J.
Effect of environmental forces on the attitude dynamics of gravity orientated satellites. Part III. Close earth orbits accounting for aerodynamic forces, pp. 34-40 (Jan.).

MOLYNEUX, Dr. W. G.
Wind Tunnel Interference in Dynamic Measurements, pp. 426-432 (July).

MOORE, Dr. N. W.
Restrictions of use of Pesticides in Temperate Climates (Lecture Summary), p. IV (Jan.).

MORGAN, SIR MORIEN
A new shape in the sky, Sixtieth Wilbur and Orville Wright Memorial Lecture, pp. 1-18 (Jan.).

NAVIGATION
Concorde navigation system, H. Hill, pp. 578-583 (Sept.) **S.**

NEILL, F. P.
The Responsibilities of Aircraft Engineers—Design, Manufacture and Maintenance—in relation to the Law (Lecture Summary), p. V (Jan.).

NETHAWAY, J. E.
Advances in helicopter avionics, (Lecture), pp. 641-646 (Nov.).

NEWHAM, D. F.
The operational angle—Hague Convention on Hijacking of Aircraft 1970, pp. 535-536 (Sept.).

NICHOLS, J. B.
The pressure-jet helicopter propulsion system, pp. 552-565 (Sept.).

NOISE
An end to aircraft noise? L. G. Dawson and T. D. Sills, pp. 286-297 (May).

OPERATIONS
All-weather operations—present achievements and future prospects, K. W. Smith, pp. 183-187 (March) **S.**

PARACHUTE DYNAMICS
A linearised theory of parachute opening dynamics, H. G. Heinrich, pp. 723-731 (Dec.).

PERROW, P. M. G.
Ground organisation of aerial crop spraying (Symposium), pp. 129-130 (Feb.) **S.**

PILCHER, P. S.
Pilcher and the multiplane—a neglected aspect of a pioneer's work, P. M. Jarrett, pp. 298-307 (May); Addendum, p. 448 (July).

POULTON, H. W.
The Common Market and Australia's external aviation policy (Twenty-seventh British Commonwealth Lecture), pp. 131-151 (March).

PRESTON TUBE
On the use of the Preston tube in elliptical ducts, J. Duffy and D. Cain, pp. 371-373 (June).

PRICE, J. S.
Targets in use in the UK (Lecture Summary), p. V (Jan.).

PRODUCTION
Modelling for production, D. Fleming and R. M. Laing (Lecture), pp. 675-681 (Nov.) **S.**

PROOF TESTING
Concept and conduct of proof-test of F-111 production aircraft, W. D. Buntin, pp. 587-598 (Oct.).

PROPULSION SYSTEMS
Development of a composite propeller blade with a carbon fibre reinforced plastics spar, W. J. Colclough and J. G. Russell, pp. 53-57 (Jan.) **S.**

RAINEY, Dr. R. C.
Flying insects as potential targets: initial feasibility studies with airborne Doppler equipment in East Africa, pp. 501-506 (Aug.).

RAO, J. S. and CARNEGIE, W.
Non-linear vibration of rotating cantilever blades by the Ritz averaging process, pp. 566-569 (Sept.).

REPRINTS
Air Law Group, p. 342 (May) **S.**
The Effect of New Materials on Aircraft Design, p. 114 (Feb.).
Test Pilots' Group, p. 274 (April) **S.**

ROTORCRAFT
Contributions of the Bell Helicopter Company to helicopter development (Twelfth Cierva Memorial Lecture), B. Kelley, pp. 157-165 (March).
Hybrid computation in aeronautical engineering, K. R. Greene, pp. 97-100 (Feb.).
The pressure-jet helicopter propulsion system, J. B. Nichols, pp. 552-565 (Sept.).

ROWE, N. E., MEDAL LECTURES
Advanced materials for aircraft brakes, Dr. John V. Weaver (Lecture), pp. 695-698 (Dec.).
Formula one air racing, R. J. Hardy (Lecture), pp. 698-703 (Dec.).
Hybrid computation in aeronautical engineering, K. R. Greene, pp. 97-100 (Feb.).

ROWE, NORBERT, E.
Experimental Establishments at Martlesham and Felixstowe (Lecture Summary), p. VI (Nov.).

ROYAL AERONAUTICAL SOCIETY
Additional Lecture, p. VI (Feb.).
Advance Notice of Spring Convention, p. V (Feb.).
AGM—11th May 1972, p. V (Feb.); p. II (March); p. V (April).
Air Transport Course, p. VI (May).
Alan Marsh Award, p. II (July).
All-day Symposium on the Future of Electronic Displays, p. III (Jan.).
Annual Report of the Council 1971, the One Hundred and Seventh, pp. 217-247 (April).
A short course on the Theory and Applications of the Air Cushion Principle, p. III (March).
Astronautical Research 1970, p. III (Jan.).
Birthday Honours List 1972, p. II (July).
Robert Blackburn Memorial Scholarship, p. III (Aug.).
Control and Guidance Techniques Symposium: Astronautics and Guided Flight Section, 4th Oct. 1972, p. IV (Sept.).
Eadon, Letitia, Award, p. VII (June).
Economics—the Quality Controller, K. J. Anderson (Lecture Summary), p. X (Oct.).
Finance and the engineer (Seminar, 29th Sept. 1971), p. VIII (June).
First International Symposium on Air Breathing Engines, p. VI (May).
How to write a paper for the *Journal*, p. 151 (March).
Institution of Civil Engineers—Luncheon Club, p. III (Aug.).
Medals and Awards 1971, p. I (Jan.).
Minutes of the AGM—11th May 1972, pp. V-VI (June).
New Year Honours List 1972, p. V (Feb.).
New Year Message from the President, p. I (Jan.).
Nomination of Candidates for Council, p. VI (Feb.); p. II (March); p. V (April).
No More Plaques, p. VI (May).
President, The, 1972-1973, p. V (May).
Rotorcraft Section Helicopter Rally and Garden Party, p. VI (April).
Optimisation in Aircraft Design—Symposium, 15th November 1972, p. IX (Oct.).
Supper Club AGM—11th May 1972, p. V (Feb.); p. II (March); p. VI (April).
Symposium on External Flows, p. III (March); p. VI (April); p. VI (May).
Two-day Convention, p. II (March); p. VI (April).

RUSSELL, J. G.
The development of a composite propeller blade with a carbon fibre reinforced plastics spar, pp. 53-57 (Jan.) **S.**

RUSTIN, Sqn. Ldr. C.
"Symbology" in Electronic Flight Instrument Displays (Lecture Summary), p. VI (Feb.).

RUTAN, B.
Fighter testing—spin test or spin prevention test? pp. 271-273 (April) **S**; Footnote, p. 341 (May) **S.**

SACHDEVA, R. C.
A numerical experiment on two-dimensional turbulent separation, pp. 509-511 (Aug.).

SATELLITES
Effect of environmental forces on the attitude dynamics of gravity orientated satellites. Part III. Close earth orbits accounting for aerodynamic forces, R. C. Flanagan and V. J. Modi, pp. 34-40 (Jan.).
The operation of the Intelsat communications satellite system, Sydney L. W. Mellen (Symposium), pp. 519-524 (Aug.) **S.**
The state of the art in remote sensing from space, Dr. W. Simmons (Symposium), pp. 524-527 (Aug.) **S.**

SCHMITT, KARL-HIENZ
Numerical results from the application of gradient iterative techniques to the finite element vibration and stability analysis of skew plates, pp. 166-169 (March).

SIMMONS, Dr. N.
The state of the art in remote sensing from space (Symposium), pp. 524-527 (Aug.) **S.**

SIMPSON, E. C.
Scar tissue and aircraft propulsion development (Lecture), pp. 607-612 (Oct.).

SHOCK WAVES
"Supersonic" flow in the animal world, Prof. J. Black, pp. 319-320 (May).

SIERAKOWSKI, R. L.
Remarks on Pontryagin's Maximum Principle applied to a structural optimisation problem, pp. 175-176 (March).

SILLS, T. D.
An end to aircraft noise? pp. 286-297 (May).

SI UNITS
SI Units applied to aircraft performance calculations, P. J. Wingham, pp. 657-658 (Nov.).

SLOCOMBE, A. E.
The Design Aspects of Heliports (Lecture Summary), p. VII (Feb.).

SMITH, A. W. J.
The Case for the Convertible Rotor—a different V-port (Correspondence), p. VI (Jan.).

SMITH, K. W.
All-weather operations—present achievements and future prospects, pp. 183-187 (March) **S.**

SONIC BOOM
On sonic boom avoidance, Dr. S. B. Batdorf, pp. 541-542 (Sept.).
Comment on Dr. Batdorf's paper, Dr. W. F. Hilton, p. 543 (Sept.).
Comment on Dr. Hilton's contribution, Dr. S. B. Batdorf, pp. 543-544 (Sept.).

SPACE
The advantages of adjoint-control transformations when determining optimal trajectories by Pontryagin's Maximum Principle, L. C. W. Dixon and M. C. Biggs, pp. 169-174 (March).
American space station activities, C. W. Mathews, pp. 83-96 (Feb.).
Metallic materials for the space shuttle (Specialist Lecture), A. A. Tavassoli, pp. 152-156 (March).
Scientific deep space probes, H. Elliot (Lecture), pp. 26-31 (Jan.).
Skylab (Illus.), pp. 83-96 (Feb.).
The space shuttle and its uses, C. W. Mathews (Lecture), pp. 19-25 (Jan.).

SPHERES
Some experiments on the flow past a sphere, J. R. Calvert, pp. 248-250 (April).

SPROSTON, J. L.
The calibration of a surface static tube, pp. 101-103 (Feb.).

SQUIRE, L. C.
Applications of shock expansion theory to the flow over non-conical delta wings, pp. 659-662 (Nov.).

STALKER, Dr. R. J.
Development of a Hypervelocity Wind Tunnel, pp. 374-384 (June).

STEPHENSON, Dr. R. J.
Social Acceptability of Heliports, particularly from the standpoint of Noise (Lecture Summary), p. VII (Feb.).

STEWART, Dr. W.
Sixteenth Henson and Stringfellow Memorial Lecture at Yeovil: The Management of the MRCA (Lecture Summary), p. V (Jan.).

STREATHER, R. A.
A New Method for the Evaluation of Slotted Wind Tunnel Interference Parameters applicable to Subsonic Oscillatory Tests, pp. 443-447 (July).

STRUCTURES
The application of nodal stress concepts to the bending of plates and shells, D. A. Jobson, pp. 712-714.
The flexibility matrix for an "exact" torsion-bending finite element, G. B. Bolland, pp. 613-615 (Oct.).
Remarks on Pontryagin's Maximum Principle applied to a structural optimisation problem, W. H. Boykin and R. L. Sierakowski, pp. 175-176 (March).

SUPERSONIC TRANSPORT
A new shape in the sky, Sixtieth Wilbur and Orville Wright Memorial Lecture, Sir Morien Morgan, pp. 1-18 (Jan.).

TAVASSOLI, A. A.
Metallic materials for the space shuttle (Specialist Lecture), pp. 152-156 (March).

THOMKA-GAZDIK, Dr. J. G.
Operator's Viewpoint (Lecture Summary), p. VIII (Feb.).

THOMAS, TUDOR
Industrial Relations in the Aviation Industry: Industrial Relations in Civil Air Transport (Symposium), p. 422 (July).

TURNBULL, Wg. Cdr.
History of free ballooning with particular reference to operational techniques (Lecture Summary), p. IV (March).

TURBINE BLADES
Non-linear vibration of rotating cantilever blades treated by the Ritz averaging process, J. S. Rao and W. Carnegie, pp. 566-569 (Sept.).

TYMMS, SIR FREDERICK
Assessment of measures, legal and physical, to fight hijacking—Hague Convention on Hijacking of Aircraft 1970, pp. 537-540 (Sept.).

VIBRATION
Follower force instability of a pod-mounted jet engine, G. T. S. Done, pp. 103-107 (Feb.).
Non-linear vibration of rotating cantilever blades treated by the Ritz averaging process, Prof. W. Carnegie and J. S. Rao, pp. 566-569 (Sept.).
Numerical results from the application of gradient iterative techniques to the finite element vibration and stability analysis of skew plates, Prof. I. Fried and K.-H. Schmitt, pp. 166-169 (March).

VTOL
V/STOL Developments in Hawker Siddeley Aviation Ltd., M. J. Brennan, pp. 391-421 (June).
Optimal paths for minimising landing transition distance for jet-lift VTOL aircraft, E. Huntley, pp. 308-317 (May).

WALGATE, J. R.
The farmers' point of view (Symposium), p. 128 (Feb.) **S.**

WANG, J. T. S., BAUER, H. F. and CHEN, P. Y.
Axisymmetric hydroelastic sloshing in a circular cylindrical container, pp. 704-

WEAVER, JOHN V.
Advanced materials for aircraft brakes (Lecture), pp. 695-698 (*Dec.*).

WHITE, C. B.
Co-operation between the parties to the project itself and third parties, pp. 192-194 (March) **S.**

WHITE, P. R.
Flying the Harrier from Ships (Lecture Summary), p. VI (Feb.).

WHITEHEAD, G. A.
Nimrod, Sixteenth Chadwick Memorial Lecture (Lecture Summary), p. VII (Feb.).

WILBUR AND ORVILLE WRIGHT MEMORIAL LECTURE, SIXTIETH
A new shape in the sky, Sir Morien Morgan, pp. 1-18 (Jan.).

WHITE, E. A. and WILDE, G. L.
Engines for civil V/STOL, pp. 627-632 (Oct.) **S.**

WILDE, G. L. and WHITE, E. A.
Engines for civil V/STOL, pp. 627-632 (Oct.) **S.**

WIND TUNNELS
A New Method for the Evaluation of Slotted Wind Tunnel Interference Parameters applicable to Subsonic Oscillatory Tests, R. A. Streather, pp. 443-447 (July).
Development of a Hypervelocity Wind Tunnel, Dr. R. J. Stalker, pp. 374-384 (June).
Spatial variations of the boundary layer in a large low-speed wind tunnel, L. F. East, pp. 43-44 (Jan.).
Theoretical velocity distributions downstream of non-uniform single and multiple smoothing screens, N. A. Jackson, pp. 251-255 (April).
Wind Tunnel Interference in Dynamic Measurements, Dr. W. E. Molyneux, pp. 426-432 (July).

WILKINSON, K. G.
Air transport development between the UK and Europe—the next twenty years, pp. 343-351 (June).

WINGHAM, P. J.
SI Units applied to aircraft performance calculations, pp. 657-658 (Nov.).

WOOD, Prof. J. C.
Industrial Relations in the Aviation Industry: An Independent View (Symposium), pp. 423-424 (July).

WOOD, H. E.
Flight procedures into and out of heliports (Lecture Summary), p. VII (Feb.).

WOODS, W. A.
A simple analytical solution to an unsteady compressible chomertropic flow problem with a zero spatial pressure gradient, pp. 318-319 (May).

WORK STUDY
Work Study in Aerospace, Luke A. Heese, pp. 457-460 (July) **S.**

YOUENS, F. P.
The Stiletto Project (Lecture Summary), p. V (Jan.).

YOUNG, P. H. and DEVRIESSE, J.
Olympus in Concorde (Lecture Summary), p. IV (March).

ZDRAVKOVICH, M. M.
Smoke observations of wakes of tandem cylinders at low Reynolds numbers, pp. 108-114 (Feb.).

ROTORCRAFT SECTION REPRINTS

The following is a list of the Journal reprints, most of which are still available.

Author	*Title*	*Published*
Mensforth, Sir Eric	**The Future of Rotorcraft and Hovercraft**	January 1967
Cheeseman, I. C. and Seed, A. R.	**The Application of Circulation Control by Blowing to Helicopter Rotors**	July 1967
Hunt, G. J.	**Autogyro Developments in North America**	December 1967
Stratton, A.	**The Principles and Objectives of Cost-Effectiveness Analysis**	January 1968
Culver, I. H.	**Progress of the Rigid Rotor Concept**	February 1968
Clarke, A. E. and Bramwell, A. R. S.	**Selected Aspects of the Aerodynamics of Rotorcraft**	February 1968
Curties, M. C.	**Helicopter All-Weather Operation—Equipment for the Transport Role**	March 1968
Meyersburg, R. B.	**Experiences of City Heliport Operations**	June 1968
Payne, N. J.	**Future City Centre Heliport**	June 1968
Bristow, A. E.	**Commercial Operation of Helicopters**	August 1968
Borst, H. V.	**Review of V/STOL Aircraft with Tilt-Propellors and Tilt-Rotors**	September 1968
Kennedy, C. D. S.	**Helicopter Armament for Land Operations**	October 1968
Silverleaf, A.	**A Review of Hovercraft Research in Britain**	December 1968
Carlson, R. M.	**Possibilities of Compound Rotorcraft—Status 1968**	December 1968
Collomosse, H.	**All-Weather Operation for Helicopters: Flight Control Systems for Helicopters**	February 1969
Legrand, L. F.	**The Next Generation of French Helicopters**	July 1969
Crago, W. A.	**Marine Safety Aspects of Helicopters**	August 1969
Phillips, F. C.	**The Canadair CL-84 Tilt-Wing V/STOL Programme**	August 1969
Yaggy, P. F.	**Future Rotorcraft Research in the USA**	September 1969
Sikorsky, S. I.	**The Helicopter Today and Tomorrow**	February 1970
Andrews, E. J.	**The External Aerodynamics of Hovercraft**	June 1970
Symposium	**Test Facilities for Helicopters. Part I**	July 1970
Symposium	**Test Facilities for Helicopters. Part II**	August 1970
Pfleiderer, K.	**Review of Bölkow Activities in the Rotorcraft Field**	August 1970
Free, F. W.	**Russian Helicopters**	September 1970
Jones, Dr. J. P.	**The Helicopter Rotor**	November 1970
Kumar, P. E.	**Some Notes on Helicopter Stability Under Constraint (71/4)**	January 1971
Gregory-Smith, D. and Marsh, H.	**The Manufacture of Glass Fibre Rotor Blades with Pressure Tappings (71/22)**	March 1971
Dabaddie, H. C.	**The Design of Helicopter Powerplants (71/49)**	June 1971
Leverton, J. W.	**The Sound of Rotorcraft (71/48)**	June 1971
Cheeseman, I. C.	**The Noise of Rotorcraft and Other VTOL Aircraft—A Review (71/52)**	June 1971
Hafner, R.	**The Case for the Convertible Rotor (71/69)**	August 1971 September 1971
Sikorsky, I.	**Sixty Years in Flying**	November 1971
Hooper, W. Euan	**Boeing Model 347 Flying Qualities Demonstrator**	December 1971
Kelly, Bartram	**Contributions of the Bell Helicopter Company to Helicopter Development**	March 1972
Bryson, L. B., Heenan, F. E. and Johnson, C. A.	**Helicopters in the Royal Navy**	August 1972
Nethaway, J. E.	**Advances in Helicopter Avionics**	November 1972
